

Yado KL67

The Yado family

The Yado is a unique chair, designed by Japanese renowned designer Jun Gobron. This chair is a constellation of clean lines, which gives this design a minimalistic vibe. Jun made this strong piece of Japanese design especially for the Yodoya Hotel. The connections made by the oak decks are clearly visible, which gives this chair a rather unique look.

Designed by
Jun Gobron

Jun Gobron is a Belgian Japanese Interior & Product Designer. He decided to pursue his passion for design and took up studies in Interior Architecture at St-Luc Brussels. He works now as an Interior Designer in an Architecture agency.

Craftmanship

Onze werkwijze

Our expertise in production techniques and design thinking was obtained through 4 generations of experience in the field. Together with the fully equipped, efficient contemporary production unit in Belgium, this forms the foundation of our brand's ambition. The aim is to bring people, nature and design together in high quality products.
